

JOSUÉ MEDELLÍN-AZUARA, PH.D.

Associate Professor

Josué Medellín-Azuara is an Associate Professor in Civil and Environmental Engineering at the University of California, Merced. He is also an Associate Director for the UC Davis Center for Watershed Sciences and the UC Agricultural Issues Center, and an Adjunct Research Fellow at the Public Policy Institute of California.

Josué is the principal investigator for the economic impact assessments of recent California droughts on agriculture and communities, and has also served at various capacities in climate change regional assessments, environmental justice in water security, and international collaborative projects with universities and other organizations around water resources management and agriculture.

Josué holds a bachelor's degree in mechanical and electrical engineering from the Monterrey Tec, a master's in business administration from the Monterrey Tec, as well as a masters in agricultural and resource economics, and a Ph.D. in Ecology-Environmental Policy from the University of California, Davis.
